

# WE INSTALLED ALL NEW **AIR PURIFICATION SYSTEMS**

## NOW THAT'S FRESH

In honor of our Ohio Promise and our commitment to our guests and staff's ongoing safety, we have installed air scrubbers and an advanced air purification system in both the Loveland and Hamilton Tano Bistros. These systems use ionic technology to reduce pathogens and allergens, and kill viruses, bacteria, and mold in the air and on all nonporous surfaces.

## AIR PURIFIERS

# PATHOGEN TEST RESULTS

ALL TESTS WERE RUN USING PROPRIETARY NPBI™ TECHNOLOGY.

### SARS-CoV-2 (Covid-19)

TIME IN  
CHAMBER

30 MINUTES

INNOVATIVE  
BIOANALYSIS

### Human Coronavirus 229E

TIME IN  
CHAMBER

60 MINUTES

ALG  
ANALYTICAL  
LAB GROUP

This test was run using the iWave-C (GPS-DM48-AC) in a test designed to mimic ionization conditions like that of a commercial aircraft's fuselage.

Based on viral titrations, it was determined that at 10 minutes, 84.2% of the virus was inactivated. At 15 minutes, 92.6% of the virus was inactivated, and at 30 minutes, 99.4% of the virus was inactivated.

This test was run in a test chamber in a lab setting with the Nu-Calgon iWave-R Air Purifier P/N 4900-20.

A petri dish containing a pathogen is placed underneath a laboratory hood, then monitored to assess the pathogen's reactivity to (NPBI) over time. This controlled environment allows for comparison across different types of pathogens.
